

NAB petition 04-160 is without basis in fact. I travel extensively and the ability to receive important information in areas not consistently served by AM or FM stations providing such information is of vital importance. The NAB should concentrate on the pornography, sexually explicit material and foul language being aired on their networks. Sit-coms, Howard Stern, etc. should be of more concern to their wannabe attorneys and lobbyists than a successful undertaking such as satellite radio which 1.7+ million people enjoy everyday.
